Utility Billing Department

November 14 – February 14 is the time frame used to calculate the new sewer charge for residential water accounts. The new rates are effective April's water bill.

If you have a leak during this time frame and have it repaired, you will need to fill out and submit a request for re-consideration of winter sewer average. You can start submitting your request to the utility billing department now through June 30th. Your completed form should be accompanied by proof of the leak being fixed. An acceptable proof of repair includes but is not limited to: a plumber's invoice or store receipt of parts purchased.

Payment options are to pay in person, by mail, or by making a payment through nCourt online or by telephone for an additional fee. All payments received prior to 5:00 pm on a business day will be posted the same day.

nCourt: www.lakeworthxpmnts.com
855-796-5763

You must have your account number and amount due to pay.

If you have any questions, please call the Utility Billing Department at 817-237-1211 x 110.

HOW TO PREVENT FROZEN PIPES

Turn Off the Water, Turn Up the Heat

When liquids freeze, they expand. When water freezes in a pipe, it can cause extensive damage. There's nothing worse than coming home to major water damage due to a few frozen pipes.

THERE ARE THREE MAIN REASONS PIPES FREEZE:

1 Drastic changes in temperature

2 Poorly insulated pipes

3 Thermostat set too low

Everything from plastic to copper can freeze—and then burst.

Pipes most at-risk of freezing:

- Close to exterior walls
- Near Swimming pools and water sprinkler supply pipes
- In unheated places like crawl spaces, attics and garages.

**UP TO 250
GALLONS**
of water can discharge through a
1/8" crack in one day.

USE THESE EASY TRICKS TO HELP YOU AVOID FROZEN PIPES:

☒ Insulate pipes located in a crawl space or attic.

☒ Use pipe sleeves, heat tape or cables on exposed water pipes.

☒ Caulk or insulate cracked seals around pipes.

☒ Open cabinet doors leading to exposed pipes or pipes close to exterior walls to allow warm air to circulate.

☒ Use an indoor shut-off valve to drain water from pipes leading to outside faucets.

**< 20 DEGREES
FAHRENHEIT**
Turn off outside water or insulate at-risk pipes as a precaution.
