Summer is here and that means not only rising temperatures, but also increased water usage.

Below are some tips for how to conserve water and save on your water bill.

Outside the home:

- We're more likely to notice leaky faucets inside, but don't forget to check outdoor faucets, pipes and hoses for leaks.
- Irrigation systems should be checked for leaks, broken sprinkler heads or blocked lines. Also check setting after power outages. Some systems revert to manufacturer's setting after an interruption in power, going off overnight, unbeknownst to you.
- Adjust your lawn mower to a height of 1.5 to 2 inches. Taller grass shades roots and holds soil moisture better than short grass.
- Use drip irrigation for shrubs and trees to apply water directly to the roots. Spread a layer of mulch to retain moisture.
- Cover the pool. If you have a pool, make sure water stays in instead of evaporating.

Changes you may see on your April water bill

- * After 2 years without an increase, trash service rates have increased by 4%, effective April 2022. The cost of trash service increases from \$9.87 to \$10.27, a difference of .40 cents. The new prices will be reflected on your April billing water bills.
- * Also new on the April billing, you can find your new Winter Sewer Average (WSA). The WSA is a fixed sewer cost, based off your water consumption during November, December and January, when usage is statistically lower. If you had a leak during these months and would like the sewer rate to be manually recalculated, you will need to submit a request for re-consideration of WSA form. The form is available in office or online on the City's website. Please also provide proof of repair, either by yourself or a plumber such as receipts for parts or invoices. You can submit a request through June 30, 2022.
